

Developing a Consistent Data Driven Methodology to Multimodal, Performance Based, and
Context Sensitive Design

OR19-100

Requisition #2746

4/11/2019

Q: Are the example community projects to be supplied by MDOT, or is it the responsibility of the contractor to identify appropriate projects around the state of Michigan?

A: The intent is for the contractor to provide the appropriate projects from around the state.

Q: Could you please explain how you foresee the budget being allocated to the various tasks/outcomes of this Project?

A: It is the proponent's responsibility to propose the allocation of effort to tasks.

Q: Also, under section 5, the DESIRED QUALIFICATIONS IN AN INVESTIGATOR(S), it is mentioned that "At least one college series of statistics courses and working experience in statistical analyses" is needed. Is this a qualification required for the PI or if one person in the team has passed these statistics courses, it's enough? Also, could you please explain what do you mean by "college series of statistic courses"?

A: One person of the research team needs to have the equivalent of one year or 2 semesters in statistics. This need not be the PI of the project team.
